**DETAILED ACTION*****Drawings***

The drawings are objected to because of the following defect of Figure 3b:

The debris 15 and shield 41 are depicted as overlapping in a manner not possible. Link 79 is located in the same position as depicted in Figure 3a in lieu of being rotated counterclockwise to laterally move shield 41 to the left (downstream) so that the gap between the upstream conveyor 14 and the shield 41 is increased.

Appropriate correction is required.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining

figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Optional and/or Suggestive Language***

The use of optional and/or suggestive language "that does not require steps to be performed or [ ] does not limit a claim to a particular structure" fails to limit the scope of the claim. (See M.P.E.P 2111.04.) The following term is optional and/or suggestive, and thus, the claim language subject to said term is given no patentable weight:

"adapted to" (claim 1, line 4 and claim 6, line 9).

### ***Claim Objections***

Claims 1-10 are objected to because of the following informalities:

The terms "means mounting" (claim 1, line 9; claim 2, line 1; claim 3, line 1; claim 6, line 13; claim 7, line 1; and claim 8, line 1) and "means biasing" (claim 4, line 1 and claim 9, line 1) are improper grammar.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "means biasing said shield (claim 1, line 10 and claim 6, line 14) lacks sufficient antecedent basis.

The term "downstream" (claim 1, lines 6 and 14; and claim 6, lines 11 and 18) should read "upstream" to conform to the disclosed location of proximal edge 46.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Patent Number US 6,371,304 B2 by Gambini ("Gambini"). The self-clearing apparatus disclosed by Gambini comprises shield 36 disposed between adjacent ends of upstream conveyor 22 and downstream conveyor 30, mounting/shaft means 37 for selecting degrees of covering the gap between said conveyors, shield biasing means 38 that biases said shield 36 towards a position of maximum gap coverage and permitting automatic movement of said shield towards a position of reduced coverage resulting from a clog of debris 13 associated with products 12 transferred between the upstream conveyor 22 and the shield 36.

***Allowable Subject Matter***

The indication of allowable subject matter of Office action dated 3 May 2006 is hereby withdrawn. Claims 3, 5 and 8-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

Claims 1-10 stand rejected. Claims 11 and 12 have been canceled by the Applicant. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark J. Beauchaine whose telephone
